The [Center for American Progress](#) is a nonpartisan research and educational institute dedicated to promoting a strong, just and free America that ensures opportunity for all. [Enough](#) is a project of the

Center for American Progress to end genocide and crimes against humanity. Founded in 2007, Enough focuses on crises in Sudan, Chad, eastern Congo, northern Uganda, Somalia, and Zimbabwe. Enough's strategy papers and briefings provide sharp field analysis and targeted policy recommendations based on a "3P" crisis response strategy: promoting durable peace, providing civilian protection, and punishing perpetrators of atrocities. The [RAISE Hope for Congo](#) campaign aims to build a permanent and diverse constituency of activists advocating for effective change in eastern Congo, including an end to the long-running conflict and the resulting sexual violence against women and girls, and reforms to reduce trade by rebel groups in conflict minerals.
